

Microsoft Intune from O2

Manage, update and protect all your
PCs and devices.
All from one web-based admin console.

 Windows Intune

As it's cloud based, it makes deploying applications, anti-malware and policy control simple. So saves time.

With built-in mobile device and app management for Windows Phone, iOS and Android you can manage and control all devices.

And you can do all this without draining resources or compromising your business data.

With Intune you can:

- * Help protect PCs from malware
- * Manage updates & distribute software
- * Get proactive monitoring and alerts
- * Provide remote assistance
- * Inventory hardware and software
- * Monitor and track licences

Key Features & Benefits

Conditional Access

Before mobile devices can access Office 365 data, they must be enrolled and healthy.

1. A user downloads the public OneDrive app on a personal iPad

2. The user is shown a page that directs them to enroll the iPad

3. The user steps through the enrollment process

4. The OneDrive app is now MDM enabled

5. The user is able to access their OneDrive data

Selective Wipe

The IT admin can wipe Office 365 data from the user's device. When they trigger the wipe all of the data cached or stored by the apps will be deleted, while all of the user's personal content remains intact.

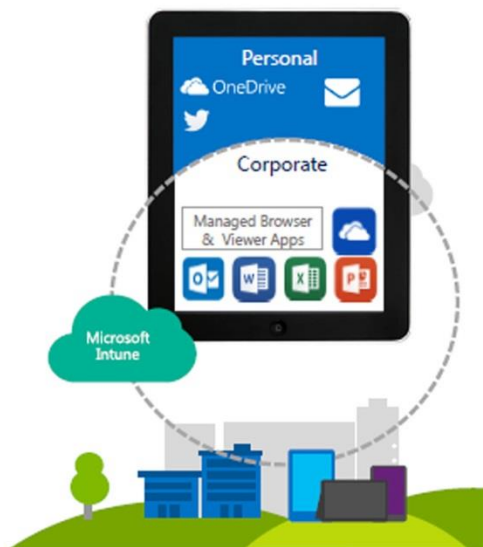

1. An employee uses Office 365 apps and data on a mobile device. The employee leaves the company.

2. The IT admin logs into Office 365 Admin Center to perform a selective wipe

3. The Office 365 data is removed from the Office applications leaving personal information intact

Mobile Application Management

Manage all of your corporate apps and data with Intune's mobile device and application management solution.
