

iPad Pro 2020 11"

Your next computer is not a computer. It's a magical piece of glass. It's so fast most PC laptops can't keep up. It has pro cameras that can transform reality. And you can use it with touch, pencil, keyboard, and now trackpad.

The edge-to-edge Liquid Retina display is not only gorgeous and immersive, but also features incredibly advanced technologies. Like ProMotion, True Tone and industry-leading colour accuracy, which make everything feel responsive and look stunning. Quite simply, this combination of features makes it the world's most advanced mobile display.

Advanced cameras combined with a large display, fast performance and highly calibrated sensors have always made iPad uniquely capable. The Wide and new Ultra Wide cameras help you frame the perfect photo or video. And together with studio-quality mics and four-speaker audio, you can even set up a multi-camera filmmaking rig.

The front-facing TrueDepth camera enables Face ID, the world's most secure facial authentication in a tablet — and in a computer.

With the A12Z Bionic chip, iPad Pro is so fast it outpaces most PC laptops available today. It makes everything you do fast and fluid, from your everyday tasks to graphics-intensive workflows. And the 8-core graphics processor means even more performance and realism for the apps and games where it matters most.
