

The iPhone 12 is powered by the A14 Bionic – the fastest chip in a smartphone. And it pushes what’s possible. Like crunching trillions of operations on the Neural Engine. Or shooting in Dolby Vision — even pro movie cameras can’t do that. It’s super-efficient for great battery life. And it’s ahead of its time, prepared to power pretty much anything that comes next.

The new OLED display boasts a vast increase in contrast, Incredible colour accuracy, and a huge jump in pixel density. OLED delivers brighter brights, darker blacks, and higher resolution for everything you look at.

Both the Wide and Ultra Wide cameras now have Night mode — and it’s better than ever at capturing incredible low-light shots. The new Wide camera brings in 27 per cent more light. So whether you take photos by daylight or by moonlight, you’ll get a level of detail and colour that wasn’t possible before.

Combine your new Apple device with MagSafe accessories for secure, safe additions including wallets and wireless chargers.

Privacy is built in. iPhone is designed to protect your information. Face ID data doesn’t leave your iPhone and is never backed up to iCloud or anywhere else. iOS shows you an app’s privacy practices before you download it. When you use Apple Pay, your credit card number isn’t shared with merchants. And the list goes on.

## iPhone 12/iPhone 12 Pro

### Specification

<b>BATTERY</b>		<b>DISPLAY</b>	
<b>Battery:</b>	2,815 mAh	<b>Screen Size/Type:</b>	6.1” Super Retina XDR OLED
<b>CAMERA – iPhone 12</b>		<b>Screen Resolution:</b>	1170 x 2532 Pixels
<b>Main Camera:</b>	Dual 12MP (wide & Ultrawide)	<b>IP RATING</b>	
<b>Selfie Camera:</b>	Dual 12MP	<b>IP Rating:</b>	IP68 dust/water resistant
<b>CAMERA – iPhone 12 Pro</b>		<b>MEMORY</b>	
<b>Main Camera:</b>	Quad: 12MP (wide), 12 MP (telephoto), 12 MP (ultrawide), 3D LiDAR scanner (depth)	<b>Memory:</b>	64GB 4GB RAM, 128GB 4GB RAM, 256GB 4GB RAM
