

A better-quality phone is better for you, better for your pocket and better for the planet. That's the idea behind Nokia G50, a future-proof smartphone that's great for today and ready for tomorrow. It's 5G-ready<sup>1</sup> thanks to the Qualcomm® Snapdragon™ 480 5G Mobile Platform at its core. Nokia G50 is also equipped with a battery that can last for days, a 48 MP triple camera supported by AI and image stabilisation, Nordic reliability and build quality and the very latest Android™ 11, with 2 years of OS updates and 3 years of monthly security updates.

#### Capture the beauty in everything

You're always looking for beauty in the world, and now you can capture it in stunning detail. The Nokia G50 is equipped with a 48 MP triple camera for capturing breath-takingly detailed pictures that you'll absolutely love.

#### Improves with age

Having a smartphone for a long time isn't much good if it starts to feel slow and outdated after a year. So, while the Nokia G50 comes out of the box with the latest Android 11, it'll also be ready for what comes next – with 3-years of monthly security updates and 2-years of OS upgrades. Now that's smart.

#### A future-proof smartphone

Nokia G50 is great now, and destined for further greatness. Because it's going to be even better once it connects to 5G<sup>1</sup>, thanks to the Qualcomm® Snapdragon™ 480 5G Mobile platform which is designed to optimize future technology. A smarter smartphone, you could say.

#### Watermark your images

Whether it's a few words or with a logo, watermarking gives you a chance to add a unique signature to mark the photos as your own.

## Nokia G50

### Specification
