

Nokia XR20 is designed for the long run. A phone that can stand up to anything life throws at it – and look great doing it. With an ultra-solid case and the toughest display glass we could find, it's scratch-resistant, drop-resistant, temperature-resistant, water-resistant and kid-and-pet-resistant. It also comes with up to 3 years of OS upgrades and 4 years of monthly security updates, so your phone will be up to date into 2025. And because you'll be using it longer, it's better for the environment. It also comes with a 1-year free screen replacement¹, and a huge three-year warranty² – should the unexpected happen.

A phone designed for the long run

Nokia XR20 is one good looking, tough, long-lasting smartphone. The sleek casing is made to the MIL-STD-810H military standard, and the screen is our toughest glass yet. So, you can drop it, get it wet, and even record your kid's football game in the roughest weather. If it gets dirty, you can just clean it with soap and water.

Safe and secure

We keep our lives on our phones. So, we want to trust that what's in there stays private. Nokia XR20 comes with monthly security updates for 4 years, so you can keep your hopes, dreams, ideas, pictures, notes, schedules and emails safe and secure into 2025. Sorry, hackers.

The toughest of tough screens

This is our toughest screen yet – Corning® Gorilla® Glass Victus™ is strong enough to resist the whims of kids, the slobber of pets, as well as drops and scratches. It also stands out in sunlight and is sensitive enough to react to the touch of wet hands and gloves.

Nokia T20
