

Samsung Galaxy

S22, S22+ and S22 Ultra

Epic for business

Introducing the new Samsung Galaxy S22, S22+ and S22 Ultra devices. It's time to invest in your business with a device that will enable you to work from anywhere. It's time for the Galaxy S22 series.

The Galaxy S22 Ultra has an unrivalled display matched with the ultimate HDR performance for an uninterrupted workspace. Its 6.8" Dynamic AMOLED 2X display, QHD+ resolution and adaptive 120Hz refresh rate ensures you're experiencing the clearest and sharpest picture to show your ideas off at their best.

Built to create

Make promoting your business second nature. The Galaxy S22 has advanced features to make it happen. The latest processing unit and AI enables brighter, clearer images with less noise—even in low light. No shot is out of reach thanks to 3x optical zoom lens, whilst the Galaxy S22 Ultra features two optical lenses allowing 4x clearer and more vivid images. And, when you're ready to share your content on your business social channels, the Galaxy S22 automatically selects the best settings for your chosen platform—or when simply sharing internally with colleagues.

Keep your data safe

Access sensitive docs from anywhere in an instant, but keep them for your eyes only, with faster fingerprint or facial recognition.

Go wherever you need to

The Galaxy S22 series is made for the anywhere workday. Tap into hyperfast 5G connectivity, work on documents and share them quicker—it's your mobile office. The Galaxy S22 includes an all-in-one wallet app to make commuter life even easier with payment cards, ID, vaccine pass, memberships and digital keys for your car, office, or home.

Performance and productivity

Easily keep pace with today's fast world of business. With the Galaxy S22 series, the only thing holding you back is how fast you can think. The devices come with Galaxy's first 4nm processor Exynos 2200, making it Samsung's fastest Galaxy ever. And, for the first time, the Galaxy S22 Ultra features an embedded S Pen* to capture inspiration on the move. The writing-to-text feature in your office apps intelligently grabs image files to translate to text and syncs notes across Galaxy devices instantly, so you can gather your thoughts whenever.
