

The M2 chip is the next generation of Apple silicon, with an 8-core CPU that delivers up to 15 per cent faster performance and a 10-core GPU that provides up to 35 per cent faster graphics performance.¹ With a 40 per cent faster Neural Engine to accelerate machine learning tasks and 50 per cent more memory bandwidth, M2 brings astonishing performance and new capabilities to iPad Pro. So you can create photorealistic 3D designs, build intricate AR models and play games with console-quality graphics at high frame rates faster than ever. All while enjoying all-day battery life.²

The Liquid Retina display on the 11-inch iPad Pro is not only gorgeous and portable, it also features incredibly advanced technologies.⁴ Like ProMotion, True Tone, P3 wide colour and ultra-low reflectivity, which make everything feel responsive and look stunning.

iPadOS 16 gives you powerful new ways to do more than ever. New desktop-class apps make your workday more productive. Resize and overlap apps to multitask like a pro with Stage Manager.⁵ And hook up an external display, with resolutions up to 6K, for even more room for all your apps.⁶

iPad has always been uniquely portable with superfast Wi-Fi and cellular options. With Wi-Fi 6E, you've got the fastest wireless connection available.⁷ So you'll get faster transfers of photos, documents and large video files.
