The M2 chip is the next generation of Apple silicon, with an 8-core CPU that delivers up to 15 per cent faster performance and a 10-core GPU that provides up to 35 per cent faster graphics performance.¹ With a 40 per cent faster Neural Engine to accelerate machine learning tasks and 50 per cent more memory bandwidth, M2 brings astonishing performance and new capabilities to iPad Pro. So you can create photorealistic 3D designs, build intricate AR models and play games with console-quality graphics at high frame rates faster than ever. All while enjoying all-day battery life.²

The Liquid Retina XDR display delivers true-to-life detail with a 1,000,000:1 contrast ratio, great for viewing and editing HDR photos and videos or enjoying your favourite movies and TV shows. It also features a breathtaking 1,000 nits of full-screen brightness and 1,600 nits of peak brightness along with advanced display technologies like P3 wide colour, True Tone and ProMotion. And you can use Reference Mode for a more colour-accurate workflow.

iPadOS 16 gives you powerful new ways to do more than ever. New desktop-class apps make your workday more productive. Resize and overlap apps to multitask like a pro with Stage Manager.⁵ And hook up an external display, with resolutions up to 6K, for even more room for all your apps.⁶

iPad has always been uniquely portable with superfast Wi-Fi and cellular options. With Wi-Fi 6E, you’ve got the fastest wireless connection available.⁷ So you’ll get faster transfers of photos, documents and large video files.
