

# Nokia G22

Built to last with recycled materials and QuickFix repairability.

## Key features:

**High performance. QuickFix repairability<sup>1</sup>. Longevity-first design.** This is smartphone autonomy, this is Nokia Sunfire: the device that empowers owners to easily replace a broken display, charging port or battery – without the need for heating pads or alcohol.

Simply consult **iFixit**, for replacement parts, tools or easy-to-follow guidance – alternatively, ask an authorised service centre to carry out the repair for you.

### Binging an array of longevity promises to the many, not the few

- 100% recycled plastic back cover
- up to 3 years of warranty<sup>2</sup> and security updates<sup>3</sup>
- a 3-day battery life capable<sup>4</sup> of 800 charging cycles<sup>5</sup>.
- the memory extension feature delivering additional virtual RAM<sup>6</sup>, gives owners the freedom to do more of what they love, faster and for longer.

### Better entertainment, with OZO Playback

means you enjoy a more refined audio experience, thanks to technology that works to equalise your speaker and wired headphone output for optimal balance and volume.

### 50MP camera with capable AI imaging algorithms

including AI Portrait, Quick Night, and Enhanced Night modes – so you can capture even more shareable shots and selfies, day or night. Plus, personalised watermarks let you signature all your photos.

<sup>1</sup>Simply consult iFixit, now in collaboration with Nokia Phones, for replacement parts, tools or easy-to-follow. See more info at [www.nokia.com/phone/self-repair](http://www.nokia.com/phone/self-repair) <sup>2</sup>See coverage at "Manufacturer's Limited Warranty" <sup>3</sup> From the global launch date of Nokia G22 <sup>4</sup>Based on real-life usage test by HMD Global. See more info at [www.nokia.com/phones/nokia-g-22](http://www.nokia.com/phones/nokia-g-22) <sup>5</sup>Battery has been tested by HMD Global to maintain at least 80% of its original capacity after 800 full charging cycles. <sup>6</sup>Pre-installed system software and apps use a significant part of memory space. <sup>7</sup>Using memory extension (virtual RAM) requires enough storage space. To protect the storage, memory extension is automatically and permanently disabled once 90% of the usage limit is reached. This can occur after 4 years of heavy usage.

<sup>8</sup> Battery has limited recharge cycles and battery capacity reduces over time. Eventually the battery may need to be replaced..
